The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (Figures 1-3 and Description of the Related Art) in view of either Daoud 5989062 or Otto et al 5624276.

The admitted prior art substantially discloses the claimed invention, including the step of claim 6 (shown in Figure 2 of the admitted prior art to the left of numeral 22) except for the connector bracket having an engagement hole engaging the hook of the clip. Daoud discloses bracket 234 having engagement hole 236, and Otto et al discloses bracket 34 having engagement hole 38. It would have been obvious to provide the connector bracket itself of the admitted prior art with an engagement hole, as taught by either Daoud or Otto et al, to simplify manufacture and assembly. Whether the connector bracket is mounted to the rear surface or the side surface of the can housing would have been an obvious matter of design depending on the specific environment.

Applicant's arguments filed December 19, 2005 have been fully considered but they are not persuasive. Daoud and Otto each disclose brackets, the meaning of "bracket" being much broader than assumed by applicant. They are analogous art since they deal with mechanical support, as does the instant bracket.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
